Discover Vulnerability Security Suite

The Corsaire Vulnerability Security Suite makes light work of understanding your existing Qualys and Nessus reporting. The Vulnerability Security Suite displays the information that matters most, in a comprehensive and user-driven dashboard.

Understand your risk rating in a matter of seconds, with full break down on real time vulnerabilities that are a risk to your organisation.

The Vulnerability Security Suite allows you to prioritise your workload and resource to manage a secure and compliant infrastructure.

MANAGEMENT REPORTS

Security Managers can quickly understand the vulnerabilities and risks in their control.

COMPREHENSIVE SCANNING

Utilise multiple automated scanning tools for a full 360 view of your infrastructure.

TRENDING REPORTS

Manage exposure risk periods with in-built reporting and threat trending.
